## LANGUAGES

- English: Basics
- Spanish: Native

## PROFILE SUMMARY

I'm a university student passionate about creating and developing software solutions. I enjoy sharing my experiences and knowledge with others and learning new things from those with more experience or better solutions.

## WORK EXPERIENCE

### Instrument and speaker charger

- Load music equipment, such as instruments and speakers. 2020 - 2022
- Connect instruments, speakers, lights and smoke machines.
- Interact with clients and event hall staff.

## PROJECTS

### FoodBox Connect

2025

Developed an IoT-based smart container for automated restaurant order pickup, reducing queues, wait times, and improving security. It enables seamless access, real-time tracking, and efficient order management through a digital platform.

### Tianguis UTCH

2024

The project was a marketplace where student entrepreneurs could gain customers and promote their ventures.

### SMTQR

2023

It was an integrative project developed by an industrial maintenance engineering team. The project consisted of a mobile application that allowed scanning QR codes placed on machines. This displayed a series of steps for maintaining said machine. It also included a calendar that indicated the dates in the month for weekly, biweekly, and monthly maintenance.

## CERTIFICATES

### B1 English EFSET
